Algorithm 1

1: **procedure** LOOP:
2:    **if** Timer > N **then** $\triangleright$ $N = 50$ ms
3:       Position $= A \sin N\omega$
4:       Velocity $= \Delta(\text{Position})/N$
5:       reset Timer
6:    **end if**
7: **end procedure**
